

CLINICAL RESEARCH

POSTGRADUATE MASTER'S PROGRAM

The extra-occupational Master's program Clinical Research is offered by the European University of Applied Sciences (Europäische Fachhochschule, EUFH) in cooperation with the research institute ikfe (Institut für klinische Forschung und Entwicklung).

This program focuses on clinical research in the context of the development of pharmaceutical and medical products. Students gain competencies that go beyond the scope of rela-

ted disciplines like medicine, law and pharmacy. The interdisciplinary program offers a unique combination of academic studies, research and practical work.

Highest quality of teaching is guaranteed through the commitment of experienced professors and renowned experts from the field of clinical research as well as other related scientific disciplines. The degree (Master of Science) qualifies for leading positions in an international context.

ABOUT THE PARTNERS

The ikfe is a private scientific research institute in Mainz (Germany). The ikfe specializes in the conception and the implementation of multinational clinical studies (phase I-IV) in the areas of diabetology, endocrinology and cardiovascular diseases. Moreover, the ikfe academy offers advanced trainings in these fields since the year 2000.

The ikfe is lead by CEO Prof. Dr. Dr. Pfützner, who is internationally renowned for his expertise on diabetes related research. Prof. Dr. Dr. Pfützner is frequently invited to speak at international expert conferences and has many publications in scientific journals to his name.

The private University of Applied Sciences EUFH was founded in 2001 and has since grown to a size of 1200 students (in 2011). More than 600 business partners value the quality of the academic programs and the practical competencies that EUFH students gain during their studies. In 2008, the EUFH received unconditional institutional accreditation from the German Council of Science and Humanities (Wissenschaftsrat) until 2018, which corresponds to the highest seal of approval that German universities can achieve.

ABOUT THE PROGRAM

ACADEMIC DIRECTOR

Prof. Dr. Dr. Andreas Pfützner

STRUCTURE

4 semesters plus Master's Thesis
extra-occupational

LOCATION

EUFH study center Mainz, Germany
Mombacher Straße 67-80
55122 Mainz

LANGUAGE OF INSTRUCTION

English

DEGREE

Master of Science – M.Sc. (Clinical
Research)

TUITION FEE

€ 18.700

CONTACT

Dr. Anke Pfützner,
Director of the ikfe academy
ikfe GmbH, Parcusstraße 8
55116 Mainz
Phone: 0049 (0) 61 31- 576 36 15
Mail: ankep@ikfe.de

AIMS OF THE PROGRAM

- Excellence in clinical research on an internationally recognized academic level
- Practical orientation
- Qualification for international and interdisciplinary teamwork
- Project and process management
- Knowledge of international standards and regulatory frameworks
- Competence in preparation, conduct and evaluation of clinical trials
- Leadership development
- Professional communication

FOR WHOM WE CREATE VALUE

- Pharmaceutical industry
- Contract research organizations
- Biotech enterprises
- Manufacturers of medical products
- Regulatory authorities / ethics committees
- Physicians, natural scientists, pharmacists
- Data managers, statisticians, biometricians
- Study monitors / clinical research associates, study nurses, clinical trial assistants
- and aspirants

PROGRAM CONTENT

MANAGEMENT OF CLINICAL STUDIES

- Preparation of clinical studies
- Study conduct
- Quality assurance
- Data management

MEDICAL SCIENCE

- Medical research
- Pharmacology
- Pharmacovigilance
- Biometry and statistics

METHODOLOGY AND SOFT SKILLS

- Regulatory affairs
- Project management
- Communication

MASTER'S THESIS

ADMISSION REQUIREMENTS

- An internationally recognized academic undergraduate degree
- Good command of the English language
- Successful completion of an assessment interview
